ENERGY METER

Do you know how much your home appliances are costing you every day? This Energy Meter measures energy consumption of your home electrical appliances. It helps you to easily cut down on energy use and costs. In addition to the energy savings, overload warning protects you and your family from the danger of electric overload.

Features

- Energy monitor and consumption tracking
- Maximum current load and wattage readings
- Energy cost calculation
- Energy usage time
- Overload warning
- Clock display in 12 or 24-hour format
- Can be used with most electrical appliances
- Replaceable battery for settings memory backup
- Green Backlight for LCD display
- Large, easy-to-read LCD display
- Line voltage - voltage (V)
- Line current - current (A)
- Max current - maximum current (A)
- Wattage - real power (W)
- Max wattage - maximum power (W)

Specifications

- Power Supply: 230V AC, 50Hz
- Rating: 10A 1200W max
- Current Resolution: 0.01A
- Battery Type: 2 x 1.5V button cells (AG13/LR44)

Product ordering number: VG338
